- I attended a specialist course in Europass Teacher Academy. The course was about inclusion, support, and successful strategies for teaching students with special needs in every classroom. We talked about methods of working with students. Our lecturer was talking about autism, Asperger's syndrome, aphasia, intellectual disabilities, social maladjustment. We exchanged experiences about our work at school. During the course I learned many activating methods and exercises for students with special educational needs. I learned how to organize space in the classroom for students. I met teachers from different European countries. I watched many presentations about work in my friends' schools. I learned specialized and professional vocabulary and consolidated my ability to use English.
- This course expanded my skills in working with students with special educational needs, and my ability to use English increased. I visited Barcelona-I was here for the first time. Thank you for everything!
